PLANT AND SOIL

Contents Volume 312 Nos. 1–2 November 2008

RHIZOSPHERE 2 International Conference - Montpellier 2007

Guest Editors:
Davey L. Jones, Timothy S. George, Angela Hodge, Petra Marschner and Philippe Hinsinger

Editorial

The rhizosphere: complex by design
D.L. Jones · P. Hinsinger 1–6

Regular Articles

Lorenz Hiltner, a pioneer in rhizosphere microbial ecology and soil bacteriology research
A. Hartmann · M. Rothballer · M. Schmid 7–14

Effects of *Azospirillum brasilense* indole-3-acetic acid production on inoculated wheat plants
S. Spaepen · S. Dobbelaere · A. Croonenborghs · J. Vanderleyden 15–23

Effect of *Rhizobium–Azospirillum* coinoculation on nitrogen fixation and yield of two contrasting *Phaseolus vulgaris* L. genotypes cultivated across different environments in Cuba
R. Remans · L. Ramaekers · S. Schelkens · G. Hernandez · A. Garcia · J.L. Reyes · N. Mendez · V. Toscano · M. Mulling · L. Galvez · J. Vanderleyden 25–37

Tolerance of common bean to long-term osmotic stress is related to nodule carbon flux and antioxidant defenses: evidence from two cultivars with contrasting tolerance
S. Sassi · E.M. Gonzalez · S. Aydi · C. Arrese-Igor · C. Abdelly 39–48

Growth, nitrogen fixation and ammonium assimilation in common bean (*Phaseolus vulgaris* L) subjected to iron deficiency
T. Slatni · A. Krouma · S. Aydi · C. Chaiffi · H. Gouia · C. Abdelly 49–57

Growth, nitrogen fixation and ion distribution in *Medicago truncatula* subjected to salt stress
S. Aydi · S. Sassi · C. Abdelly 59–67

Root traits and taxonomic affiliation of nine herbaceous species grown in glasshouse conditions
C. Roumet · F. Lafont · M. Sari · F. Warembourg · E. Garnier 69–83

Impact of growth and uptake patterns of arbuscular mycorrhizal fungi on plant phosphorus uptake—a modelling study
A. Schnepf · T. Roose · P. Schweiger 85–99

Localised nitrate and phosphate application enhances root proliferation by wheat and maximises rhizosphere alkalisation in acid subsoil
C. Weligama · C. Tang · P.W.G. Sale · M.K. Conyers · D.L. Liu 101–115

Phosphorus acquisition characteristics of cotton (*Gossypium hirsutum* L.), wheat (*Triticum aestivum* L.) and white lupin (*Lupinus albus* L.) under P deficient conditions
X. Wang · C. Tang · C.N. Guppy · P.W.G. Sale 117–128

Phosphatase and phytase activities in nodules of common bean genotypes at different levels of phosphorus supply
A.P. Araújo · C. Plassard · J.J. Drevon **129–138**

Dynamics of phosphorus fractions in the rhizosphere of common bean (*Phaseolus vulgaris* L.) and durum wheat (*Triticum turgidum durum* L.) grown in monocropping and intercropping systems
H. Li · J. Shen · F. Zhang · M. Clairotte · J.J. Drevon · E. Le Cadre · P. Hinsinger **139–150**

Root exudation and rhizosphere acidification by two lines of *Medicago ciliaris* in response to lime-induced iron deficiency
W. M'Sehli · S. Youssfi · S. Donnini · M. Dell'Orto · P. De Nisi · G. Zocchi · C. Abdelly · M. Gharsalli **151–162**

The ecological significance of the coarse soil fraction for *Picea abies* (L.) Karst. seedling nutrition
N. Koele · E.E. Hildebrand **163–174**

Organic acid extraction from rhizosphere soil: effect of field-moist, dried and frozen samples
T. Mimmo · M. Ghizzi · C. Marzadori · C.E. Gessa **175–184**

Glyphosate-induced impairment of plant growth and micronutrient status in glyphosate-resistant soybean (*Glycine max* L.)
S. Bott · T. Tesfamariam · H. Candan · I. Cakmak · V. Römheld · G. Neumann **185–194**

Role of rhizosphere mechanisms in Cd uptake by various wheat cultivars
M. Greger · T. Landberg **195–205**

Oxygen input controls the spatial and temporal dynamics of arsenic at the surface of a flooded paddy soil and in the rhizosphere of lowland rice (*Oryza sativa* L.): a microcosm study
M.N. Bravin · F. Travassac · M. Le Floch · P. Hinsinger · J.-M. Garnier **207–218**

Mycorrhizosphere mediated Mayweed Chamomile invasion in the Kashmir Himalaya, India
M.A. Shah · Z. Reshi · I. Rashid **219–225**

Background photograph is a typical rendzina soil profile colonized by roots of oak trees (soil is about 50 cm thick) taken in a 'Causses' karstic plateau North of Montpellier (South of France), where the Second International Rhizosphere Conference was hosted in August 2007. The RHIZOSPHERE 2 logo was designed by Georges Llambrich and Philippe Hinsinger. It shows calcium carbonate precipitates around a biopore as induced by a root of chlorotic peach tree growing in a calcareous soil.
